Low-volume
precision spraying

BW – BV

**LOW VOLUME TRAILED SPRAYER
WITH CENTRIFUGAL FAN**

From \$51,950 +GST*

The BW-BV mounted sprayer is engineered for precision and reliability in medium-height orchards and vineyards.

Equipped with a polyethylene tank featuring circuit and hand-washing compartments, it ensures convenience and safety during operations. It's centrifugal air fan with a de-clutching and free wheel system provides uniform airflow, while the galvanised steel chassis and adjustable air diffuser guarantee durability and adaptability.

The sprayer includes a brass electric remote control unit with a pressure regulator and tractor-mounted data mate for precise operation. Additionally, it's high-pressure internal agitator ensures efficient mixing of pesticides.

- Main polyethylene tank (lowered version) th. 6/8 mm with circuit and hand-washing tank.
- Double suction mono-speed centrifugal air fan with de-clutching and free wheel system (1+f).
- 180° air diffuser with adjustable side deflectors.
- External filter with self-filling functionality.
- ANNOVI REVERBERI brass pump for high performance.
- Anti-drift brass nozzles for environmentally friendly spraying.
- Three-point hitch for easy mounting.
- Chassis & conveyor in hot galvanised steel for max durability.
- Complies with CE regulations.

Made with
Hardox

POWER REV 200

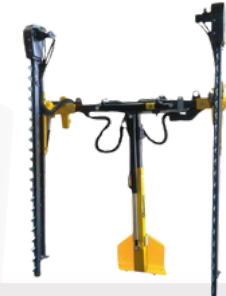

**REVERSIBLE SHREDDER
WITH HYDRAULIC MOVEMENT**

From \$21,700 +GST*

POWER REV the name says it all. The ultimate cutter with dual work mode (front and/or rear), featuring a robust double-frame design with a three-point hitch, built to handle heavy impacts. The double-reinforced sheeting absorbs shocks, while the liquid paint finish enhances durability. It also includes an adjustable rear roller for optimal working height. Last but certainly not least, it comes with a reliable transmission, using a gearbox with dual PTO (front and rear), a free internal wheel, and toothed belts with 3 to 5 elements, depending on the machine's length.

- Double case structure with internal HARDOX sheet
- Sheet thickness: 10 mm (5 + 5mm)
- Double three-point CAT attachments: 1-2 for mounting on both front and rear lifts
- Chromed rods Ø60 for smooth, balanced sliding of connections
- Transmission for front PTO (1000 rpm) and rear PTO (540rpm), in both standard and reversible versions
- Rotor with hammers and screws Ø20 mm
- Mechanical movement, hydraulic option available on request
- Adjustable rear levelling roller (Ø 160mm)
- No. 2 rows of counter knives
- Three-point attachment 1° and 2° category
- PTO 540/1000
- Recommended for tractors 40/70hp
- Size 215x130h 50 cm
- Weight 875kg

Mechanical Tilting

PRUNING ECO 400

**DOUBLE BLADE TRIMMER
WITH QUICK COUPLING**

From \$19,600 +GST*

The ECO 400 Orizzonti is a dual-bladed fixed column pruning machine designed for front tractor mounting. As part of Orizzonti's entry level range, it maintains high reliability and efficiency while keeping a simple structure. It features two 160 cm vertical dual-blade mowing bars, each equipped with gas shock absorbers to reduce impact during operation.

The machine is primarily mechanically operated, except for the hydraulic lift of the main column. Sturdy and dependable, the ECO 400 is an excellent choice for medium to large vineyards, particularly on flat terrain.

- Customizable setup with vertical bars (160-200 cm) and topping bars (100 cm)
- Hydraulic lift with speed regulator and quick coupling pipes
- Mechanical movements: bar tilt, side extension
- Counter plate for quick tractor coupling
- Resting stand for easy storage
- Requires 180 bar and 20 litres oil/min
- Compatible with tractors of 40 hp/25 kW
